

# High School Math

## Keep Ahead of the Game

At Crabapple Tutoring, our High School math students build **solid understanding** to take back to the classroom.

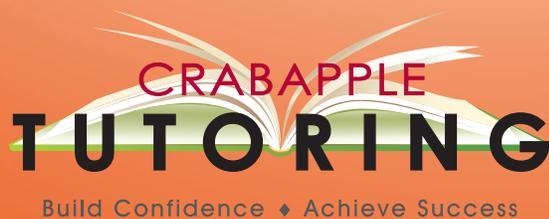

The Crabapple Tutoring approach to building a foundation for independent learning in High School Math is based on **understanding core concepts**. These concepts are directly related to specific **computational skills and problem solving techniques** required in each area. Lesson plans are drawn from an extensive mathematical library and delivered by certified instructors.

The Crabapple Tutoring High School Math Program includes **Algebra 1 & 2, Geometry, Pre-Calculus, and Calculus**.

Our program is **individualized** to meet the needs and follow the schedule of each student. Students will receive **classroom support** with preloading in math concepts, skills and techniques needed to be successful in school. When major tests are approaching, our instructors will review the anticipated topics. This review, coupled with our problem solving methods and materials, helps each student maximize their grades.

### The High School Programs feature:

- Diagnostic assessment with prescriptive process
- Individualized instruction
- A nationally recognized curriculum
- A systematic approach for independent learning
- An ability to strengthen basic math skills
- Test review and preparation
- Caring/trained/motivating instructors
- Confidence building
- Ongoing communication with students, parents, and teachers to continually evaluate student progress
